SUMMARY

Frontend-focused Angular Developer, a fresher, seeking a full-time role to build scalable, high-quality web applications. Proficient in Angular 17+, RxJS, NgRx, and modern CSS frameworks, with hands-on internship experience delivering responsive interfaces, component-driven architecture, and REST API integration. Eager to contribute to a collaborative team and drive user-centric outcomes.

EXPERIENCE

Angular Developer Intern | Confidential Internship   Gurugram, India | May 2025 - August 2025
• Developed responsive, cross-device web applications using Angular 17, enhancing user experience.
• Built reusable components with two-way data binding and implemented routing to reduce code duplication and improve maintainability.
• Integrated RESTful APIs via HttpClient for real-time data exchange and seamless backend communication.
• Implemented form validation, route guards, and service-based component communication to ensure secure and reliable SPA functionality.

TECHNICAL SKILLS

Programming Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript, Java
Frameworks / Libraries: Angular 17+, RxJS, NgRx, Bootstrap, Tailwind CSS
Tools / Platforms: VS Code, Git, Postman, Chrome DevTools
Databases: SQL (MySQL, PostgreSQL)

EDUCATION

B.Tech CSE - GL Bajaj Group of Institute   August 2019 - July 2023

PROJECTS

Probing Survey Creation   Angular, TypeScript, HTML, Tailwind, REST API

Designed and implemented a frontend platform for creating, editing, and managing surveys with secure token-based authentication and REST API integration. Built modular Angular components leveraging RxJS for asynchronous data flows and state management, ensuring a responsive and scalable UI. Implemented client-side form validation, role-based access controls, and efficient routing to optimize user workflows. Collaborated with backend teams to integrate REST endpoints, improving data reliability and performance.

Taker Web Application   Angular, Java Servlets, Hibernate, MySQL, HTML, CSS, Bootstrap

Developed a notes-focused frontend enabling create, edit, and delete operations with a responsive UI using Angular and Bootstrap. Implemented data persistence through REST APIs and a robust backend stack (Hibernate, MySQL) ensuring data integrity. Integrated secure authentication and authorization within an MVC architecture to safeguard user data. Optimized user workflows with component-driven design and reusable services for maintainability.

Analytic Dashboard for Surveys   Angular, Tailwind CSS

Built an internal analytics dashboard to visualize survey data through interactive charts and tables. Implemented data-driven visualizations and filtering, enabling rapid insights, aggregation, and drill-down analysis. Engineered responsive UI with Tailwind CSS and optimized performance for real-time data updates. Collaborated with stakeholders to translate analytical requirements into actionable metrics and dashboards.
